SSR 2018-2023**

QUERY

7.1.2 b) Provide Bills for the purchase of equipments for 1. Alternate sources of energy and energy conservation measures 2. Management of the various types of degradable and nondegradable waste 3. Water conservation 4. Green campus initiatives 5. Disabled-friendly, barrier free environment for 2022-23.

RESPONSE

Institution has installed two 5KV solar panels as an alternative energy source to administrative block and solar powered street lamps are installed in main area of the campus to keep the campus illuminated even during power failure. Most of the ordinary fluorescent tube lights in the campus are replaced with power conserving LED bulbs.

For water conservation, the waste water from RO unit in administrative block is stored in an underground tank and it is used for toilets. This tank was constructed by PWD. Waste water from hand washing unit is used to water the plants maintained by commerce department. Rain water is also harvested by constructing rain water harvesting units in the campus.

For green campus initiatives, our institution gets samplings sponsored by philanthropists and forest department. These are planted inside and outside the campus and maintained by NSS volunteers and the departments. Most of the departments are maintaining their gardens.

Disabled friendly barrier free environment is ensured by the institution by provision of ramps in all the blocks in the campus. Tactile tiles are paved in newly constructed buildings. These are done by PWD.

The fund for all these infrastructure development and maintenance is allotted by state government to public works department of the state. Hence all the bills are settled and maintained by that department.

Institution is given the utilization certificate signed by AE of PWD which is produced in the attachment.
